November, 2012

Dear Friends.

Thanks to all who stopped by the Oasis booth at Doggie Doo. The staff enjoyed seeing old friends as well as former Oasis dogs accompanying their new families. Beautiful

**Charlie** (left) and **Sophie** (white, center) get lots of attention at Doggie Doo. Both need homes.

weather brought animal lovers out in droves to take part in the annual event, which had to be canceled because of rain and cold last year.

The shelter continues to be very crowded, and the staff's holiday wish list remains the same as last year's: more adoptive families and more volunteers to help care for our friends. They really need extra TLC and walks during winter months when the cold temperatures necessitate longer periods of confinement.

In an hour or two one morning each week, a volunteer can make a huge difference in a shelter dog's life. To learn more, please contact Oasis or Kathy ([kathykormish@yahoo.com](mailto:kathykormish@yahoo.com)).

The staff wishes you and yours the best of holidays this season. As always, thank you for all you do for Oasis dogs

## OASIS RECEIVES GIFT OF MUSIC

Soft melodic sounds now flow through the shelter, comforting those inside. In October, the Rescue Animal Mp3 Project donated an Mp3 player filled with specially formulated music to Oasis. The nonprofit project was founded by holistic veterinarian Pamela Fisher, who has observed the positive results of the special music in her own North Canton practice.

The organization's purpose is summarized on its website. "Many rescued animals are traumatized and fearful as a result of their

challenging life experiences. We share with you the passion to improve their quality of life."

The music, donated by artists from around the world, is the result of research, detailed on the group's website at [www.rescueanimalmp3.org](http://www.rescueanimalmp3.org). The site offers a wealth of information about the project and its applications for pet owners. Oasis is thankful to be a recipient of this fine group's efforts and hopes to witness therapeutic effects of soothing music at the shelter.
